

## **Jeremy Hammond**

**Co-CEO  
hyperTunnel**

Jeremy is the Co-CEO of hyperTunnel which, having completed the first ever underground structure built entirely by robots, is on a mission to transform the way the world builds tunnels. hyperTunnel is developing revolutionary InfraTech for tunnels and underground schemes which is faster, safer, more economical and environmentally friendly than current techniques. hyperTunnel uses a unique combination of proven technologies from diverse industries – including digital twins, robotics, 3D printing and digital underground surveying, supported by AI and VR – to redefine what is possible in tunnel construction, enlargement, monitoring and repair.

Jeremy, an economist by training, leads the commercial side of hyperTunnel, bringing his experience as a business owner and entrepreneur in the property and renewable energy sectors, following FMCG global, regional, and country leadership GM roles with two FTSE 10 multinationals (BAT and SABMiller) and Smith & Williamson across four regions and forty countries.

Jeremy's recent experience included being a director at Red to Blue Limited, an infrastructure innovation company developing solutions focused on the transition from fossil fuel to clean and renewable energy. He has 30 years of experience in delivering high profile IT, engineering, and management projects with multiple stakeholders / partners.
